In reference you requested the coordination of the Committee on Overhead Reconnaissance in the referenced document. COMOR concurs with the following provisos:

- a. That the recommendation in para 9 which applies to COMOR be revised in its third sentence to substitute "being considered" for "are included" so that that sentence would then read: "The following suggestions are being considered in the COMOR review."
- b. COMOR does not concur at this time in the definitions set forth in para 11 of the referenced paper since it considers that a clarification of definitions is an essential part of the review which it is undertaking at the instance of the Security Committee.
- c. The COMOR also noted that the portions of the basic paper pertinent to communications intelligence should be understood to apply to satellite-derived SIGINT, which is currently handled in accordance with the security principles pertinent not only to the TALENT Control System (KEYHOLE) but appropriate COMINT and ELINT controls as well.
